

CLASS 8 SCIENCE SYLLABUS

Chapter: Chemical Effects of Electric Current

Topics Covered:

1. Introduction to Electric Current
2. Conductors and Insulators
3. Electrolytes and Their Properties
4. Chemical Effects of Electric Current
5. Electrolysis Process
6. Electroplating
7. Applications of Electroplating
8. Electrolysis of Water
9. Electrolysis of Brine
10. Uses of Electrochemistry in Daily Life

Learning Outcomes:

- Understand the process of electrolysis
- Explain electroplating with examples
- Differentiate between conductors and electrolytes
- Describe industrial applications of electrochemistry
- Solve conceptual and application-based questions
